Word Problems: Divide With Remainders

G4

Word problems with division and remainders teach how to divide numbers when they don't split evenly. This helps students solve real-life problems, like sharing items or grouping, while understanding leftover amounts.

Q1 Jack baked 15 cookies and divided them equally among 5 plates. How many cookies were left over after dividing?

A. 0 cookies

B. 1 cookies

C. 2 cookies

D. 3 cookies

Q2 Jack baked 15 cookies and divided them equally among 4 plates. How many cookies were left over after dividing?

A. 0 cookies

B. 1 cookies
