Equal parts and unit fractions

G6

Equal parts and unit fractions show how to divide something into equal pieces. Unit fractions represent one part of the whole. Learning this helps students understand sharing, dividing, and the basics of fractions in everyday life.

Q1 Circle is divided into 4 equal parts. What fraction does each part represent?

A. $\frac{1}{4}$

B. $\frac{1}{2}$

C. $\frac{1}{5}$

D. $\frac{1}{3}$

Q2 A rectangle is divided into 2 equal parts. What fraction does each part represent?

A. $\frac{1}{4}$

B. $\frac{1}{2}$

C. $\frac{1}{5}$

D. $\frac{1}{3}$

Q3 A square is divided into 8 equal parts. What fraction does each part represent?

A. $\frac{1}{4}$

B. $\frac{1}{2}$

C. $\frac{1}{8}$

D. $\frac{1}{3}$
