Compare Lengths Indirectly

G1

Comparing lengths indirectly means figuring out which object is longer or shorter without measuring directly. It helps us understand size differences by using another object as a reference, making it easier to compare things around us.

Q1 Which pencil is longer if Pencil A is longer than Pencil B, and Pencil B is longer than Pencil C?

A. Pencil A

B. Pencil B

C. Pencil C

D. Same length

Q2 Which object is taller if a book is shorter than a water bottle, and the water bottle is shorter than a chair?

A. Book

B. Water bottle

C. Chair

D. Same height

Q3 Which ribbon is the shortest if Ribbon X is longer than Ribbon Y, and Ribbon Y is longer than Ribbon Z?

A. Ribbon X

B. Ribbon Y

C. Ribbon Z

D. Same length

Q4 Sam has a stick that is longer than his ruler, and his ruler is longer than his pen. Which item is the shortest?

A. Stick

B. Ruler

C. Pen

D. Same length
