## Determine Importance

In our life, when someone tells you rules for a game, you **determine importance** by remembering the rule that helps you win the game. When you read, you determine what is important to you, too.

**Read the text carefully. Then, determine the importance.**

Frogs are amphibians. They live near water and hop with their strong legs. Frogs do not drink water like people. They soak up water through their skin. Frogs eat bugs, worms, and insects. Frogs come in different colors to stay safe. Green frogs hide in plants. Bright frogs warn animals that they are poisonous. The biggest frog is the Goliath frog, which is as big as a cat! Frogs help the world by eating insects.
