Question Critically to Evaluate Arguments

How to Ask Questions:

1. Ask questions as you read.
2. Find answers in the text or by thinking and searching.
3. Reflect, read on, and keep questioning.

Choose the correct answers based on the passage.

How Seasons Began

Long ago, the Earth goddess had four children: Fall, Winter, Spring, and Summer. They all created weather for Earth but refused to take turns, causing chaos. The weather switched unpredictably—warm and sunny one moment and icy cold the next. Animals were confused, and plants couldn't grow.

To fix this, the Earth goddess taught her children to take turns. Winter came first with cold weather, followed by Spring, Summer, and Fall. This is why we experience seasons throughout the year.

1. Why did weather on Earth become chaotic?

- A. The goddess did not stop her children from fighting.
- B. The children refused to take turns with the weather.
- C. Summer preferred cold, while Winter preferred warmth.

2. How did the Earth goddess solve the weather problem?

- A. She made her children take turns.
- B. She stopped them from making weather on Earth.
- C. She changed the weather herself.
