Clarify Author's Purpose

How to Monitor and Clarify

1. Pause whenever you find the text confusing. Reflect on its meaning.
2. If the meaning is still unclear, read the text again. If necessary, continue reading for additional context.
3. Consider how the meaning became clearer as you reread or read further.

Choose the correct answers based on the passage.

Passage1: Understanding Photosynthesis

Photosynthesis is a vital process for plants. During photosynthesis, chlorophyll absorbs sunlight and uses it to convert carbon dioxide and water into glucose and oxygen. This process occurs in the chloroplasts of plant cells.

1. Is the explanation of photosynthesis easy to understand?

- A. Yes, because terms like “chlorophyll” are helpful.
- B. No, because terms like ‘chloroplasts’ are not explained.
- C. No, because it skips key steps in the process.

2. What is the purpose of this passage?

- A. To explain how plants make food.
- B. To make readers interested in biology and plants.
- C. To entertain readers with plant facts.
