Analogies: Cause and Effect, Measurement, and Geography – Answer Key

Analogies are comparisons that show relationships between pairs of words or concepts. They help students understand how words are connected and build critical thinking skills. Often, analogies are written like this:
precipitation : rain as sea : ocean

Read each analogy below and identify the most appropriate word to complete it.

1. fire : burn as flood : _____
 - A. sink
 - ☒ B. drown
 - C. sparkle
 - D. erupt
2. sun : heat as rain : _____
 - A. grow
 - B. fall
 - ☒ C. soak
 - D. shine
3. wind : erosion as earthquake : _____
 - ☒ A. destruction
 - B. movement
 - C. explosion
 - D. repair
4. forest : trees as tundra : _____
 - A. snow
 - B. lakes
 - ☒ C. shrubs
 - D. hills
