

Name _____

Date _____

Compound Sentences in a Paragraph

A **compound sentence** combines two independent clauses using coordinating **conjunctions**. This helps make writing more engaging and smooth.

Complete Sentence **+** ,Conjunction **+** Complete Sentence

Read the chart to remember the "FANBOY" conjunctions:

f or	a nd	n ot	b ut	o r	y et
-------------	-------------	-------------	-------------	------------	-------------

Underline the sentences and rewrite them into compound sentences using a conjunction from the chart above. The answer varies.

The Solar System is made up of the Sun, eight planets, and countless moons and asteroids. Mercury is the closest planet to the Sun. It has no atmosphere. Venus, which is the second planet, is covered in thick clouds that trap heat. Earth is the only planet known to support life. Its surface is mostly covered with water. Mars is often called the "Red Planet" because of its reddish appearance. The outer planets, such as Jupiter and Saturn, are giant gas planets. Saturn is famous for its beautiful rings. Neptune and Uranus are far away. They are very cold. The Solar System is vast and full of mysteries.
