Questions to Explore Complex Texts

How to Ask Questions

1. While reading, notice the questions that come to mind.
2. Consider where to find the answers—by rereading the text or reading further while keeping the question in mind.
3. Reflect on how the answer enhances your understanding of the text.

Read the passage and write down the answers.

Passage A:

Online learning allows students to learn anytime and explore many subjects. However, it requires self-motivation, which can challenge students without support.

Passage B:

Traditional classrooms offer immediate feedback and social interaction, making them more effective. Technology should support—but not replace—in-person education.

1. What are the advantages and challenges mentioned in Passage A?

2. How does Passage B's perspective differ from Passage A?

3. Ask one analytical question for each passage.

Questions to Explore Complex Texts – Answer Key

How to Ask Questions

1. While reading, notice the questions that come to mind.
2. Consider where to find the answers—by rereading the text or reading further while keeping the question in mind.
3. Reflect on how the answer enhances your understanding of the text.

Read the passage and write down the answers.

Passage A:

Online learning allows students to learn anytime and explore many subjects. However, it requires self-motivation, which can challenge students without support.

Passage B:

Traditional classrooms offer immediate feedback and social interaction, making them more effective. Technology should support—but not replace—in-person education.

1. What are the advantages and challenges mentioned in Passage A?
Advantages: flexibility and variety of topics. Challenge: self-motivation required.
2. How does Passage B's perspective differ from Passage A?
Prefers in-person education for feedback and interaction, with technology as secondary support.
3. Ask one analytical question for each passage.
Passage A: "Does online learning work for all types of students?"
Passage B: "How important is social interaction for effective learning?"
