Facts and Opinions in Arguments

Fact and Opinion helps readers distinguish between proven truths and personal beliefs. A **fact** can be proven true, like “Trees produce oxygen,” while an **opinion** is what someone feels, like “Everyone should plant a tree.”

Read the argument below and answer the questions to evaluate the use of facts.

Argument:

Social media harms teenagers. Research shows that teens who use social media for over three hours daily are more likely to face mental health issues. Likes and comments can lower self-esteem, leading to addiction. Schools should ban social media during school hours to improve mental health.

1. What facts are used in the argument? Are they relevant?

2. Are the facts sufficient to support the argument? Why or why not?

3. What additional evidence could strengthen the argument?

Facts and Opinions in Arguments – Answer Key

Fact and Opinion helps readers distinguish between proven truths and personal beliefs. A **fact** can be proven true, like “Trees produce oxygen,” while an **opinion** is what someone feels, like “Everyone should plant a tree.”

Read the argument below and answer the questions to evaluate the use of facts.

Argument:

Social media harms teenagers. Research shows that teens who use social media for over three hours daily are more likely to face mental health issues. Likes and comments can lower self-esteem, leading to addiction. Schools should ban social media during school hours to improve mental health.

1. What facts are used in the argument? Are they relevant?

Facts: “Teens using social media for over three hours daily face mental health issues.”

Relevance: Yes, it relates to the dangers of social media.

2. Are the facts sufficient to support the argument? Why or why not?

Sufficiency: The facts are relevant but insufficient. No specific studies or detailed examples are provided.

3. What additional evidence could strengthen the argument?

Additional Evidence: Include statistics on the number of affected teens, examples of mental health impacts, and expert analysis.
