Revise: Word Choice and Sentence Flow

Revising is the step to improve your writing by choosing better words and making sentences flow smoothly. It's about improving ideas and their expression, not fixing small errors like spelling or punctuation.

Here is a draft Nick wrote about improving school environment. Read it and choose the right answer.

Trees are important because they clean the air and help everyone feel healthy. They stop pollution and give us air to breath. For example, trees pull in bad gases, like carbon dioxide, and makes oxygen for people. More trees can make things around safer and good for peoples and animals. Planting trees at school help students get fresh air and make everyone more healthy.

1. Look at this sentence: "They stop pollution and give us air to breath." Which revision improves the vocabulary variety?

A. They reduce pollution and provide fresh oxygen to breathe.

B. They stop pollution and make better air to breath.

2. Look at this sentence: "More trees can make things around safer and good for peoples and animals." Which revision improves the sentence flow and vocabulary?

A. More trees make the air safe and gooder for peoples and animals.

B. More trees make the environment safer and better for people and animals.
