

Name _____

Date _____

Conventions: Parallel Structure and Advanced Punctuation

Parallel structure ensures that words or phrases in a sentence follow the same grammatical form, which improves clarity and flow. For example, “I like running, swimming, and to bike” is incorrect because “to bike” does not match the form of “running” and “swimming.” Instead, it should be “I like running, swimming, and biking.” Advanced punctuation, such as semicolons and colons, is used to connect closely related ideas or introduce examples. For instance, “She had one goal: to win the race” appropriately uses a colon to introduce the goal. Parallel structure and proper punctuation make writing more sophisticated and professional.

Read the following draft about the impact of technology and correct any issues with parallel structure, punctuation, or spelling mistakes.

Technology has transformed the way we live and work it allows us to communicate instantly, access information quickly, and solving problems efficiently. Moreover advancements in artificial intelligence have revolutionized industries such as healthcare education and transportation. However some argue that technology has led to negative effects including privacy concerns distractions and the loss of personal connections. Whether you view technology as a blessing or a challenge it is clear that its influence on society is profound and long-lasting.
