Group Together Ideas and Details

Keeping our thoughts **organized** helps the reader understand what we write. Imagine a grocery store where bananas, oranges, and apples were all mixed together. It would be hard to find what you need! When we write, our ideas are like the baskets, and our details are like the fruit that goes inside them.

Read the science article and organize the sentences in the right place.

A. While doing this, pollen sticks to the bee's body.

B. Pollination helps plants grow seeds.

C. This means fewer flowers and fruits for us.

How Bees Help Plants

Bees are amazing creatures that do an important job in nature. They help plants grow by spreading pollen. **First**, a bee visits a flower to collect nectar. _____.

Next, the bee flies to another flower. As it lands, the pollen on its body falls onto the new flower. This is called pollination. _____.

Finally, without bees, many plants would not be able to make seeds. _____. That's why bees are so important in nature.
